

**Subject:** Pre-Flight Notification: Illuminating Company Fall Routine Patrol 09/30/2021

Greetings:

Please be advised that beginning today, weather permitting, GeoDigital International (GDI) will be conducting an airborne survey along FirstEnergy transmission right-of-way. These patrols are anticipated to take a few days to complete, weather permitting – however, any storm-related or outage patrols could prolong completion. The helicopter to be used for these patrols is as follows:

- **Grey and Silver - tail registration number N28NA – no photo available**

Routine patrols such as this are part of our Vegetation Management program with a focus on maintaining reliability of FirstEnergy's transmission system.

Feel free to contact me with any questions or concerns.

Thank you!
