

Road Update #4
Canyon Woods Reconstruction
6.29.2021

The tilling operations and base stabilization is ongoing and we expect that the contractor will continue the stabilization in the next several days, weather dependent.

Once they have completed this part of the project there will be a 5 day cure period where limited work will take place. We will provide the next update as we come out of the cure period.

We understand that the current road conditions have been challenging and have asked the contractor to insure the road stays passable. We thank you for your patience.
